

Affiliate Programs:

These are the affiliate programs that your **The Email List Building Playbook** promotes. Before you do anything make sure that you get ALL of your affiliate links so you can edit the report with your affiliate links before giving it away. Of course, you can also remove all mentions of products from this report (*they are marked in red*) and give it away and/or sell it just with the content in it. But, that would be silly when you can make money with it. Put in a little work here, get your links, and get paid! 😊

Now, some of them will require you to get "approval". If you don't get approved for a product the first time, contact the product owner, and tell them that you're a real person. Tell them where your site is, how you plan to promote their product (*via your list that you're building*), and it helps a lot if you provide them links to your social media account to show that you're a real person.

1. LearningIM.com Full Workshop Bundle Lifetime Offer
